

# **CON EDISON AWARDS GRANT TO CARVER CENTER**

A grant of \$17,000 from Con Edison Westchester was recently awarded to the Carver Center in Port Chester to support the science, technology, engineering, arts and math (STEAM) and Teen Scholars programs.

The STEAM program provides a hub for innovation and promotes hands-on, project-based learning. Through a partnership with the Clay Arts Center, the Carver Center programming starts in its elementary school CAP program. The support from Con Edison helps Carver offset the costs of the supplies needed for the space and the consulting costs for workshops.
